ACCESS AND DISCOVER OUR

HISTORY

INNOVATION, SUSTAINABILITY AND TECHNOLOGY

Mould offers maximum quality in the development of its products and services, adopting the latest technology in equipment, software and raw materials.

*With a team of more than **300 employees** committed to innovation and highly qualified, **sustainability** appears as a constant agenda in everyday life, generating new projects and causing changes.*

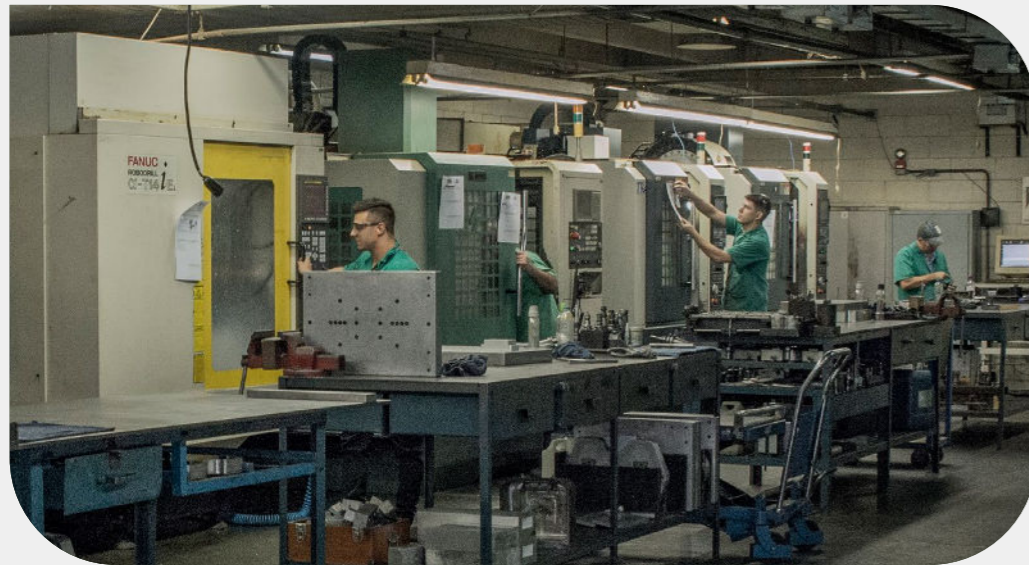

Currently, with its headquarters and two more branches located in Sapiranga, in Rio Grande do Sul, Mould has an accurate three-dimensional measurement system and a machining sector with precision equipment capable of working with hardened steel up to 60 HRC in the High Speed machining center.

CLICK AND SEE MORE OF OUR
STRUCTURE

*We offer our customers **matrix production, sole injection and our own boaonda® brand.***

MACHINING AND MATRIXING

Matrices are produced in aluminum, steel or zamak through a CAD / CAM system for plastic injection and polyurethane (PU, PVC, TR, rubber).

*With a machining **sector with precision equipment** capable of working with hardened steel up to 60 HRC at the High Speed machining center, the ability to create **exclusive projects** is guaranteed, as well as viewing parts ideas in 3D.*

BOAONDA'S MANIFESTO

WALKING TO THE FUTURE

Boaonda® has already started its journey
towards a more conscious future.

Discover the project
Walking to the Future.

90% of waste generated from production is **recycled and reused** in a new boaonda®

100% of the products do not use raw material from **animal sources**.

CLEAN ENERGY: electric energy that is totally **renewable** and does not harm the environment.

All aluminum matrices are recycled and transformed into new parts, making the life cycle of the material longer.

Our employees are inspired weekly with information on the use of natural resources to **change daily habits in the company and in their homes**.

Currently the boaonda® brand has a line of sustainable products called Hope. This line carries a **load of 60% recycled material and 100% recyclable**.
